

App Documentation

1. App Name

Coffee Hub

2. App Idea Description

Coffee Hub is a simple mobile application designed to help users discover coffee drinks and enjoy a complete café experience. The app allows users to order coffee in different ways, including home delivery, pickup from the café, or reserving a table inside the café. It provides a smooth and visually appealing interface for browsing drinks, viewing details, and placing orders easily.

3. Target Users

- Coffee lovers and café customers
 - Students and young adults
